

Air1 serves me as a resident of the local community because it is the only radio station that will play music that is Christian and also sounds similiar to the music being played on 92.7. or 100.5. This would be a terrible effect on the local community if Air1 was to be replaced. We have many friends that play Air1, a young man had his radio playing Air1 with his doors wide open at the corner of his construction worksite I had the same station playing in my car so I knew it was Air1. Seeing this was awesome because the music that this station plays is awesome. The service Air1 provides is a public interest because it can literally change the way your family and children see and listen to God and Jesus. It is an outreach of ministry for our youth. And as a parent I need Air1 in my local community, in my car, and in my home.
